

ANESTHESIA AND SURGICAL CONSENT FORM

Mountainstone Veterinary Hospital
1626 Stuart Rd – Cleveland, Tn 37312

Surgery or Treatment Requested

Owner Name _____ Patient Name _____

Owner Signature _____ Date _____

Emergency Contact Name/Number _____

Spay _____ Neuter _____ Dental _____ Cat Declaw 2 feet _____ Cat Declaw 4 feet _____ Other _____

Did your pet eat this morning? NO _____ YES _____ Last time pet has eaten? _____

Is your pet showing any signs of illness? NO _____ YES _____ (if yes, list signs) _____

What medication is your pet currently taking? _____

Has your pet had any adverse reactions to anesthesia in the past? NO _____ YES _____

Patients with fleas and/or ticks will be treated at owner's expense to ensure a flea/tick free environment

ADDITIONAL SERVICES

Please list any additional services your pet may need today. Example: **bath, vaccines, nail trim** etc

MICROCHIP: Permanent identification for your pet **(\$62.00)**

☐ **YES** – I want my pet to receive a microchip

☐ **NO** – I understand the benefits of microchipping my pet, but decline today/my pet is already microchipped

PRE-ANESTHETIC BLOOD TESTING - \$105.00

(THIS IS REQUIRED OF ALL PATIENTS 5 YEARS AND OLDER FOR SURGICAL PROCEDURES)

Like you, our greatest concern is the well-being of your pet. Some conditions including disorder of the liver, kidneys and blood are not detected unless blood testing is performed. Anesthetic agents are processed in the body by the liver and kidneys. Any disorder regarding these organs can increase your pet's anesthetic risks, including death. For this reason, all of our veterinarians highly recommend pre-anesthetic blood testing.

Please choose one of the following options:

☐ **YES** – I WANT my pet to have Pre-Anesthetic blood testing at the cost of **\$105.00**

☐ **NO** – I DECLINE Pre-Anesthetic blood testing and I understand the risk in not testing for abnormalities

☐ Pre-Anesthetic blood testing is required due to the age of my pet or type of procedure being performed

☐ Pre-Anesthetic blood testing was already done on _____

INTRAVENOUS CATHETER AND FLUID THERAPY - \$44.50
(REQUIRED FOR ANY ABDOMINAL SURGERY-SPAY, SPLENECTOMY, EXPLORATORY, ETC)

We recommend every patient undergoing anesthesia have an IV catheter placed and be on fluids throughout the procedure. The benefits of having an IV catheter placed include: Maintaining blood pressure, keeping the patient hydrated, providing immediate access to the vein to deliver medication in the event of an emergency, and helping the patient expel the anesthetics from their body faster, allowing them to recover more quickly and smoothly.

Please choose one of the following options:

- ☐ **YES** – I WANT my pet to have an IV catheter at the cost of \$44.50
- ☐ **NO** – I understand the benefits but decline IV catheter and fluid therapy for my pet.

PAIN MEDICATION (FOR AN ADDITIONAL CHARGE)

Like us, pets feel pain. Therefore, we prescribe pain medication for all our surgical patients and for our dental patients that have had extractions.

I understand pain medication is **NOT OPTIONAL** for my pet's procedure if recommended by the doctor.

Owner initial _____

DENTAL X-RAYS (\$135.00)

Dental radiographs are an essential tool in the diagnosis and treatment of oral conditions in your pet as 60% of the tooth lies under the gums. X-rays allow assessment of the tooth, root, bone as well as nasal cavity and sinus. We recommend that your pet have x-rays each year during your pet's dental

- ☐ **YES** - I would like my pet to have dental x-rays performed during his/her dental
- ☐ **NO** - I understand the benefit of dental x-rays but DECLINE dental x-rays at this time.

DENTAL EXTRACTIONS (ADDITIONAL CHARGE)

Depending on the degree of dental disease present, extractions MAY be necessary during your pet's dental. Extractions are often an expense we cannot estimate until a thorough exam and x-rays are performed while the patient is under anesthesia.

- ☐ **YES** – It is ok to extract teeth if the doctor feels it is medically necessary
- ☐ **NO** – I must be contacted prior to the performance of ANY tooth extractions. By choosing this option, I fully understand that my pet will be under anesthesia longer and I accept responsibility for increased medical risk and /or cost. I also understand that if I cannot be contacted within a reasonable amount of time that my pet will be wakened from anesthesia. If I choose at a later time to have the procedure performed, it will require additional anesthesia and cost.
